1 Kertenkeleler soğuk iklime fazla dayanıklı olmadıklarından genel olarak çöllük bölgelerde ve tropikal kuşakların kurak kısımlarında çok görülür. Kertenkelelerin uzunca ve yuvarlakça olan vücutlarının üzerleri pullu veya pürüklüdür. Çoğunlukla dört ayaklı ve pek azı iki ayaklı veya tamamen ayaksız olurlar

2 Sincaplar iğne yapraklı ağaçların tohumlarını dişleri ile kozalakları ısırarak serbest bırakırlar. Meşe palamutları, ceviz, badem, fındık, tomurcuklar, mantarlar, taze ağaç kabukları, böcekler, salyangozlar ve kuş yavruları ile beslenirler. Tohumları tek tek toprağa gömerek saklarlar veya kovuklarda depolarlar.
