1 Çitaların vücudunda benekler ve gözlerinin altından ağzına ve çenesine inen siyah çizgiler vardır. Bu çizgiler güneş ışınlarını çeker ve böylece diğer yırtıcıların aksine günün en sıcak saatlerinde bile rahat bir görüş ile avlanabilirler. En bilinen özelliği hızlı koşmasıdır. Dünyanın en hızlı koşan memelisidir

2 Papağanlar doğada ağaçlarda yaşarlar. Ancak insan sesini ve melodileri ezberleyerek tekrarlama kabiliyetlerinden dolayı, birçok evde kafeslerde beslenirler. Kafeslerine çignemeleri için ağaç parçaları koymak faydalıdır. Yuvalarını ağaç kovuklarına, kaya yarıklarına yaparlar. Eşler birbirlerine bağlıdır.
