1 Yengeçlerin beş çift bacakları vardır. Bunların ilki bir çift kısıpaca sahiptir. Yengeçler yan yan yürür çünkü bacakları sadece bu yöne doğru bükülür. Yengeçlerin insanlar gibi damarları yoktur. Bu nedenle yengeçlerde açık dolaşım görülür. Hem otçul hem de etçildirler ve genellikle su yosunları ile beslenirler.

2 Denizati nüfusu son yıllardaki aşırı avlanma nedeniyle tehlike altına girmiştir. Denizati geleneksel Çin şifalı bitki biliminde kullanılmaktadır ve her yıl yirmi milyon denizati bu amaçla yakalanıp satılmaktadır. Denizati arka yüzgeç ve kafada solungaçların yanındaki göğüs yüzgeçleri ile tam bir balıktır.
