ŞİFRE Lİ METİN

1 Kaplumbağaların başı vücutlarına oranla çok ufaktır. Ağzları bir kuşun gagasına benzer. Dişlerin yerini sert kemiksi bir damak almıştır. Kaplumbağalar, bununla besinlerini yakalar ve ezerek mekanik sindirim yapar. Dil kafasına oranla büyük ve yumuşaktır. Kaplumbağaların ayak uçlarında beşer parmak vardır.

2 Otçul olan filler; savan, orman, çöl ve bataklık gibi doğal yaşam alanlarında bulunur. Genellikle su kenarlarında kalmayı tercih eder. Diğer hayvanlar fillerden uzak durur ve aslan, kaplan, sırtlan ile yabani köpekler gibi yırtıcılar yalnızca yavru fillere saldırır. Filler doğal ortamlarında yetmiş yıl kadar yaşar.
