ŞİFRE Lİ KARE

1 Mısır ve Endonezya kökenli olduğu sanılan hindibanın, onaltıncı yüzyıldan bu yana Avrupa'da tarımı yapılmaktadır. Salata ve sıcak yemek olarak tüketilir. Türkiye'de yaygın olarak yabancı hindibanın yaprakları ilkbaharda toplanarak şifalı ot ve sebze olarak tüketilir. Bu yapraklar "Hindiba" ve "Radika" olarak bilinir.

2 Karpuz, sıcak ve ılıman iklimde yetişir. Soğuklardan çok etkilendiği için yetişme devresinde don tehlikesi olmamalıdır. Tohum ekiminde toprak sıcaklığı oniki derecenin üzerinde olmalıdır. Nem oranı fazla olan yerlerde hastalıklar görülebilir. Karpuz yağ ve kolesterol içermez ancak şeker içeriği yüksektir.
